

# MediCare – Relational Schema

Hospital Information and Management Database

## 1. DEPARTMENTS

- department\_id PK
- name
- location

## 2. DOCTORS

- doctor\_id PK
- name
- specialisation
- department\_id FK → DEPARTMENTS
- consultation\_fee

## 3. PATIENTS

- patient\_id PK
- name
- dob
- gender
- phone
- blood\_group

## 4. APPOINTMENTS

- appointment\_id PK
- patient\_id FK → PATIENTS
- doctor\_id FK → DOCTORS
- appointment\_date
- status

## 5. DIAGNOSES

- diagnosis\_id PK
- appointment\_id FK → APPOINTMENTS
- description
- diagnosis\_date

## 6. ROOMS

- room\_id PK
- room\_type
- daily\_charge
- is\_available

## 7. ADMISSIONS

- admission\_id PK
- patient\_id FK → PATIENTS
- room\_id FK → ROOMS
- admit\_date
- discharge\_date

## 8. PAYMENTS

- payment\_id PK
- appointment\_id FK → APPOINTMENTS (nullable)
- admission\_id FK → ADMISSIONS (nullable)
- amount
- mode
- payment\_date

## 9. MEDICINES

- medicine\_id PK
- name
- manufacturer
- unit\_price

## 10. PRESCRIPTIONS

- prescription\_id PK
- appointment\_id FK → APPOINTMENTS
- issued\_date

## 11. PRESCRIPTION\_MEDICINES

- prescription\_id PK, FK → PRESCRIPTIONS
- medicine\_id PK, FK → MEDICINES
- dosage
- duration\_days

## Payment Constraint

A payment is associated with either an appointment or an admission, but not both.

**Key:** PK = Primary Key, FK = Foreign Key
